Contact Number: +639461592863

BS Computer Engineering student with experience in full-stack web development, customer service, administrative support, and data handling. Adaptable, detail-oriented, and eager to apply technical, communication, and problem-solving skills in an entry-level software development, web development, IT support, or administrative-technical role.

Passionate about website design and continuous learning, with a proactive mindset and a strong drive to stay productive, take initiative, and consistently improve both technical and creative skills.

PROFESSIONAL EXPERIENCE

TAO Corporation Center

Full-Stack Developer Intern (300 Hours)

Ugong, Pasig

Mar 2026 – May 2026

- Developed a full-stack Policy Management System using React TypeScript and ASP.NET Core / C#.
- Built modules for policy creation, approvals, audit logs, archiving, role-based access, dashboard features, and document workflows.
- Integrated backend services for email notifications, PDF generation, approval tracking, and policy status management.
- Debugged workflow bugs, improved validation logic, and optimized system reliability.
- Enhanced UI/UX through modal workflows, status badges, dropdown restrictions, and audit history visibility.

Gardner College Cainta

Registrar's Assistant (On-the-Job Training – 80 Hours)

Cainta, Rizal

Jan 2022 – Feb 2022

- Assisted in organizing and maintaining student academic records with attention to accuracy and confidentiality.
- Supported enrollment and documentation processes to ensure smooth administrative operations.
- Responded to student inquiries regarding registration and academic requirements.
- Managed data entry tasks using office productivity tools.
- Demonstrated reliability and professionalism in handling sensitive institutional records.

NC's Kitchen

Service Crew

Cainta, Rizal

Feb 2019 – Jan 2021

- Delivered customer service in a fast-paced food service environment while maintaining efficiency and accuracy in order processing.
- Handled cash transactions and ensured proper balancing of daily sales reports.
- Coordinated with kitchen staff to maintain smooth workflow and timely service delivery.
- Maintained cleanliness and organization of the service area in compliance with company standards.
- Developed strong communication and multitasking skills through daily customer interactions.

EDUCATION

Rizal Technological University

Bachelor of Science in Computer Engineering (BSCpE)

Pasig, Metro Manila

Aug 2022 – Present

- Municipal Academic Scholarship Recipient (College Level)
- Dean's Lister — Term 1 and Term 2
- First Year Representative — ALCES (Alliance of Computer Engineering Students), Term 1

- Graduated with Honors
- Class Representative
- Developed foundational knowledge in computer systems, basic programming, and digital tools

PROJECTS

Policy Management System

Technologies: React TypeScript; C#; SQL; REST API; PDF Generation; Email Integration

- Developed a full-stack web-based system for managing company policies, approval workflows, document tracking, and audit history.
- Built frontend modules for policy creation, review, approval, archive management, role-based access, and dashboard monitoring.
- Created backend APIs for approval processing, audit logging, email notifications, PDF generation, and policy status updates.
- Implemented workflow actions including approve, return, void, archive, inactive handling, and permission-based access.
- Improved system usability and reliability by debugging issues, refining validation logic, and enhancing UI workflow components.

Air Pollution AI Mini Bot

Languages: Python; Vanilla HTML; SQL

- Designed and structured the web interface using Vanilla HTML to display real-time Air Quality Index (AQI) and Indoor Air Quality (IAQ) readings.
- Created a clean and organized layout for visualizing sensor data collected by the autonomous minibot.
- Developed user-friendly data presentation sections for environmental monitoring results and system status updates.
- Collaborated with backend integration to ensure accurate and dynamic display of pollution data.
- Focused on improving usability and clarity in presenting technical environmental metrics to users.

Embedded System Module – Raspberry Pi 4B Based

Languages: Python; Vanilla HTML; SQL

- Designed and implemented the front-end interface for monitoring multiple sensor outputs in real time.
- Structured web pages to display processed data from sensors such as MPU-6050, MQ-2, NEO-6M, PIR, and DHT.
- Organized layout elements for motion detection alerts, email notification logs, and system status updates.
- Ensured responsive and readable presentation of technical data for user accessibility.
- Collaborated with backend components to synchronize sensor data with the web interface.

Smart Locker System (NFC) – Arduino and Raspberry Pi Based

Languages: C++; Python; Vanilla HTML; SQL

- Designed the web interface for user registration, access management, and locker status monitoring.
- Structured intuitive HTML forms for authentication and NFC-based access control.
- Focused on clean layout design to enhance user navigation and system interaction.
- Worked closely with backend logic to ensure seamless integration between front-end input and authentication processing.
- Contributed to UI refinement to improve clarity and user experience in real-time locker management.

Point of Sale System (POS)

Languages: C#; Python; SQL

- Designed user interfaces for inventory tracking, transaction processing, and sales reporting.
- Developed structured and intuitive layouts for both the Python (Tkinter) and C# (Windows Forms) implementations.
- Focused on user-friendly navigation, clear data presentation, and organized input forms.
- Improved visual hierarchy to enhance usability and reduce transaction processing errors.
- Collaborated in integrating the UI with SQL databases for real-time inventory and sales updates.

Queuing Management System

Languages: Java; SQL

- Designed the user interface for ticket generation and queue monitoring displays.
- Structured clear visual indicators for normal and priority queue classifications.

- Focused on intuitive layout to ensure easy understanding of queue position and service flow.
- Assisted in integrating queue logic with the front-end display for real-time updates.
- Enhanced user experience by organizing queue data presentation for clarity and efficiency.

OTHERS

Languages: English, Filipino

Programming Languages: Python, Vanilla HTML, CSS, JavaScript, React TypeScript, C#, ASP.NET Core, PHP, SQL, Java, C, C++, Assembly (DOS)

Professional Development: Software Developer Intern / On-the-Job Training, TAO Corporation, 2026; On-the-Job Training, Registrar's Assistant, Gardner College Cainta, 2020; Service Crew, NC's Kitchen, 2019 to 2021; Sales Aide, Floor Assistant, and Data Handling's PA, Livesmart Asia, 2025 to Present; Academic Leadership, First Year Representative, ALCES (Alliance of Computer Engineering Students), 2022; Municipal Academic Scholarship Recipient, 2022 to Present; Dean's Lister, Term 1 and Term 2

Software/Technical Skills: Full-stack web development using React TypeScript and ASP.NET Core/C#; REST API development; SQL database handling; Role-based access control; Google Workspace tools including Docs, Sheets, and Meet; Front-end development using Vanilla HTML; Basic knowledge of Python, SQL, and C#; Data entry and documentation management; Familiarity with embedded systems concepts and sensor integration; Basic understanding of computer hardware fundamentals; AI-assisted productivity and research tools; Basic troubleshooting for hardware and software concerns; Customer service and sales support systems

Specific Other Relevant Skills or Experiences: Detail-oriented with analytical and observational abilities; Adaptable and capable of thriving in fast-paced and changing environments; Experienced in managing confidential academic and sales-related records with discretion; Effective communicator with strong collaborative teamwork skills; Creative thinker with a focus on UI design and structured layout development; Self-motivated and consistently driven to complete tasks efficiently, often finishing work ahead of deadlines; Skilled in utilizing AI tools to support learning, organization, and workflow optimization.

Interests and Hobbies: UI/UX Design; Web Development; Automation; IoT Development; Software Development; Open-Source Software; Community Engagement; Gaming.
